Launch Azure Data Factory Studio

The screenshot shows the Microsoft Azure portal interface. At the top, there's a navigation bar with the Microsoft Azure logo, an 'Upgrade' button, a search bar, and a user profile. Below the navigation bar, the main content area displays the 'bencydatafa' Data factory (V2) overview. The left sidebar contains a navigation menu with options like Overview, Activity log, Access control (IAM), Tags, Diagnose and solve problems, Resource visualizer, Settings, Getting started, Monitoring, Automation, and Help. The main content area shows the 'Essentials' section with details about the Data factory (V2), including its status (Succeeded), location (East US), and subscription (Azure subscription 1). Below this, there's a large 'Launch studio' button. At the bottom, there are four tiles: Quick Starts, Tutorials, Template Gallery, and Training Modules.

Required Details are configured from **searchapi** to a notepad

The screenshot shows a Notepad window with the following text:

```
my api : 7LJwsjXL5dCAhEjgTCRxmXUz
base URL : https://www.searchapi.io/api/v1
relative URL : search?engine=google_flights&departure_id=TVM&arrival_id=DEL&outbound_date=2026-09-15&return_date=2026-09-20
&currency=USD&hl=en&api_key=7LJwsjXL5dCAhEjgTCRxmXUz
```

The status bar at the bottom indicates the cursor is at line 3, column 176, with 252 characters, in plain text format, at 100% zoom, using Windows (CRLF) line endings, and UTF-8 encoding.

Linked Services created

The screenshot shows the Microsoft Azure Data Factory portal. In the left-hand navigation pane, the 'Linked services' option is highlighted with a red box. The main area displays the 'Linked services' page, which includes a table listing existing services. A red box highlights the 'LS_ADLS' and 'LS_REST' services in the table. A notification banner at the top right states 'Successfully created' and 'Successfully created LS_ADLS (Linked service)'.

Name	Type	Related	Annotations
LS_ADLS	Azure Data Lake Storage Gen2	0	
LS_REST	REST	0	

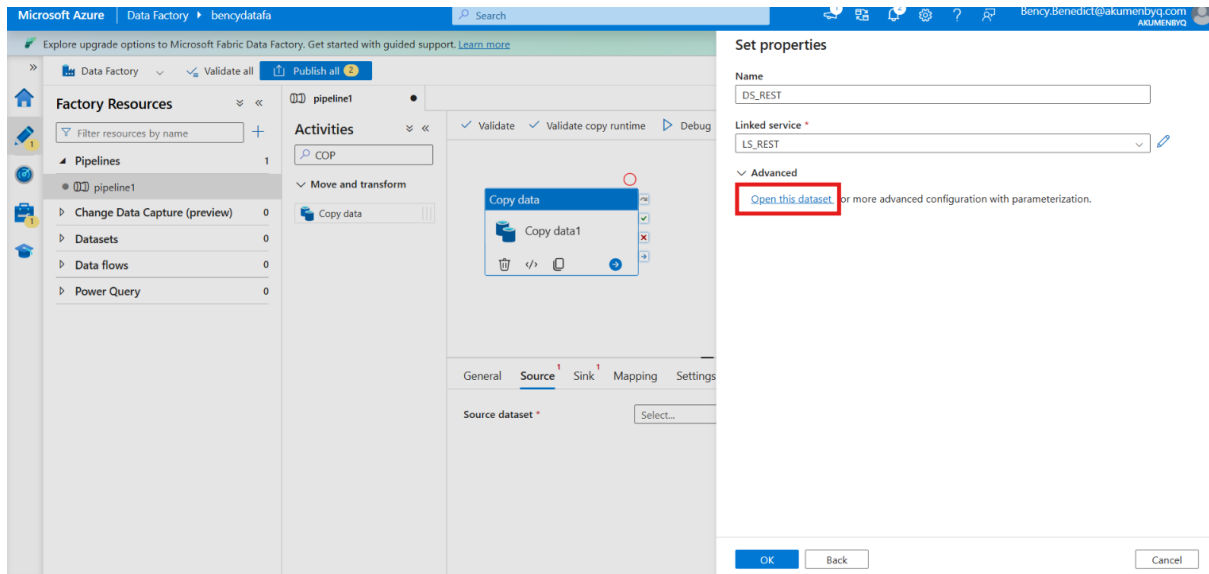

New pipeline created

The screenshot shows the Microsoft Azure Data Factory portal. In the left-hand navigation pane, the 'Pipelines' option is highlighted with a red box. A context menu is open, showing options like 'New pipeline', 'Pipeline from template', and 'New folder'. The 'New pipeline' option is highlighted with a red box. The main area displays a 'Select an item' prompt with a visual representation of a pipeline and a button to 'Migrate to Fabric (Preview)'.

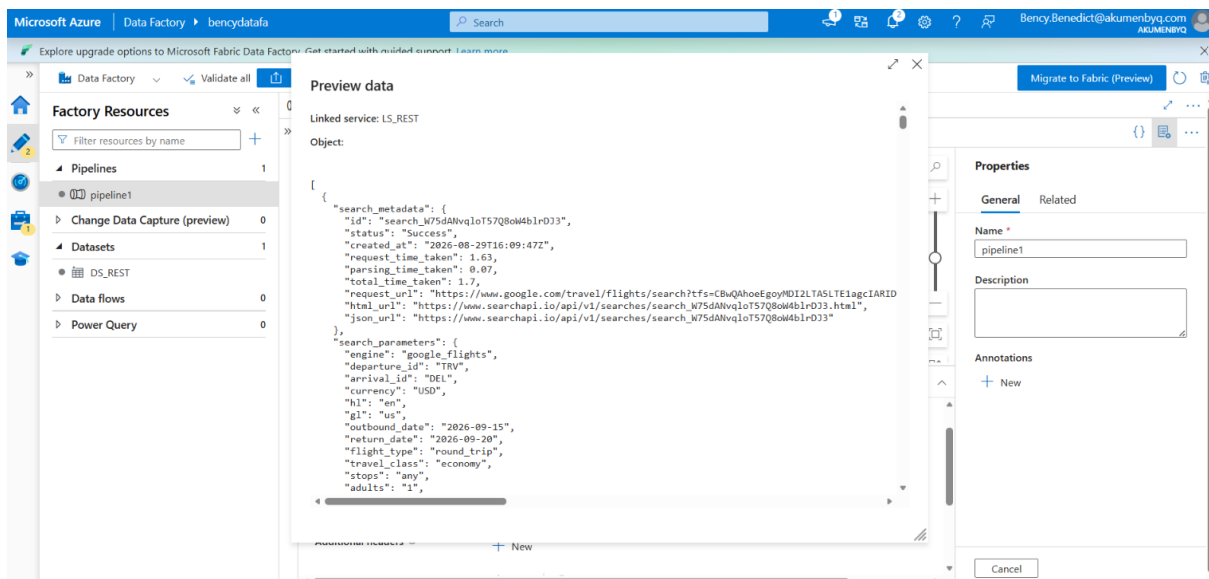

CopyData is selected from activities and dragged into panel

The screenshot shows the Microsoft Azure Data Factory portal. In the left-hand navigation pane, the 'Pipelines' option is highlighted with a red box. A context menu is open, showing options like 'New pipeline', 'Pipeline from template', and 'New folder'. The 'New pipeline' option is highlighted with a red box. The main area displays a 'Select an item' prompt with a visual representation of a pipeline and a button to 'Migrate to Fabric (Preview)'. A 'Copy data' activity is being added to the pipeline, as indicated by a red box around the activity icon in the 'Activities' panel.

- Source Dataset configured
- Select **Open this dataset**
- Required **BaseURL** and **RelativeURL** are pasted from notepad

File path for **DS_ADLS** configured

- **Container:** output
- **Directory:** search.json?engine=google_flights&departure_id=JFK&arrival_id=LAX&outbound_date=2026-09-15&return_date=2026-09-20¤cy=USD&hl=en&api_key=7LJwsjXL5dCAhEjgTCRxmXUz
- **FileName:** @concat('flights/', dataset().origin, '-', dataset().destination, '/', formatDateTime(UTCnow(), 'yyyy/MM/dd'))

DS_ADLS Dataset properties configured

Validate the pipeline and debug it

The screenshot shows the Microsoft Azure Data Factory interface. On the left, the 'Factory Resources' pane lists 'Pipelines' with 'pipeline1' selected. The main canvas displays a 'Copy data' activity with 'Copy data1' as the dataset. Above the activity, the 'Validate' and 'Debug' buttons are highlighted with a red box. The 'Properties' pane on the right shows the 'General' tab with the pipeline name 'pipeline1' and a description field. Below the activity, the 'Parameters' tab is active, showing a table with columns 'Name', 'Type', and 'Default value'. The table contains two rows: 'origin' with type 'String' and default value 'TVR', and 'destination' with type 'String' and default value 'DEL'.

Information Fetched to Output Container as json format

The screenshot shows the Microsoft Azure Storage Explorer interface. The left pane shows the 'output' container. The main pane displays the contents of the container, including a directory structure 'output > flights > TVR-DEL > 2026 > 08 > 29'. A file named 'TVR_DEL_20260829_162959.json' is highlighted with a red box. The file's properties are shown in a table below:

Name	Last modified	Access tier	Blob type	Size	Lease state
TVR_DEL_20260829_162959.json	29/8/2026, 10:00:11 pm	Hot (Inferred)	Block blob	18.91 KiB	Available

Flight Informations of specified requirements are obtained as json format

The screenshot shows the Microsoft Azure Storage Explorer interface. The left pane shows the 'output' container. The main pane displays the contents of the container, including a directory structure 'output > flights > TVR-DEL > 2026 > 08 > 29'. A file named 'flights/TVR-DEL/2026/08/29/TVR_DEL_20260829_162959.json' is highlighted with a red box. The file's properties are shown in a table below:

Name	Last modified	Access tier	Blob type	Size	Lease state
flights/TVR-DEL/2026/08/29/TVR_DEL_20260829_162959.json	29/8/2026, 10:00:11 pm	Hot (Inferred)	Block blob	18.91 KiB	Available

The JSON content of the file is displayed in the main pane, showing flight information for a round trip from Thiruvananthapuram International Airport to Indira Gandhi International Airport. The JSON is formatted as follows:
